Every year we arrange for a unique collection of different topics including, the industries' latest trends and developments as well as sessions that are designed to analyse the legal and practical issues in bonds and guarantees, explain their uses, highlight the areas of potential risk, show how to circumvent looming problems and teach effective drafting and documentation techniques.

For this to be delivered, ICC Austria can rely on the most distinguished expert speakers with not only long, successful careers in this global industry but also active involvement in the continuous work of the ICC Banking Commission.

World trade is at a turning point. With the threat of economic nationalism and isolationism in the US, Brexit and increasing threats of tariffs in countries like India the institutions and structures of global trade are being challenged. This presentation looks at whether we are witnessing an end to globalisation through the patterns in world trade generally and European trade in particular. It argues that the multilateralism that we have come to take for granted is vital, not just for economic growth, but also for geopolitical stability.
