What it is about

What makes this conference different and successful is our strong and distinctive focus on educational content. Our vision is to provide for a truly international forum that addresses the challenges and seeks to answer the questions Letters of Credit practitioners face in their daily business environment.

Every year we arrange for a unique collection of different topics including, the industries' latest trends and developments as well as sessions that are designed to analyse the legal and practical issues in Letters of Credit. In the year of the Dragon we will return with our country spotlight to China. Educationally, we will cover the latest changes to ISBP 821 and what is in store next, as well as transfer and back2back LCs. The electronic B/L and its impact on the industry will have us pay closer attention to transport documents in general and allows us a perspective on the future of letters of credit. Finally, we will cover latest trends on the current hot topics: ESG and sanctions & compliance.

Do not miss the chance to take part in in-depth training sessions, discussion of the current challenges and the invaluable opportunity to meet with your peers from around the globe.
