Background & Objectives

EU Sanctions – also referred to as “restrictive measures” – against third countries, individuals or entities, are an essential EU foreign policy tool that it uses to bring about change in policy or activity by the target country, government, entities or individuals.

US Sanctions, Export or Re-export Control Regulations apply whenever firms

- sell or resell US origin products or services
- sell or resell products, parts or components using US origin software or technology
- use US origin parts & components in a manufacturing or assembly process
- incorporate US origin subsystems, software & technology into products
- sell products with US origin to domestic customers that (might) export these products
- re-export US origin products, software or technology to sensitive destinations

For an EU manufacturer, bank, trader, forwarder it is therefore essential to comply with your respective local, EU, UN & US regulations. Violations may severely affect your business! This conference will enable you to stay within the law! Even if, for example, a US product has been imported legally into the EU, it doesn’t mean that the export can be done without a US license! The neglect of US re-export-regulations can lead to a total ban to trade with US goods for the non-compliant company & bank and severe fines.

Learn, when and how EU and US sanctions, export and re-export controls regulations are applied, how they interrelate with each other, how to apply this knowledge in your daily business to avoid unintentional diversion of EU and/or US products and technology to sensitive activities and/or destinations.
