Background & Objective

Looking at the latest Trade Finance news, there seems to be a strong notion that the on-going pandemic has accelerated digitalization of Trade Finance significantly. Irrespectively, if that is driven more by hope than actual reality, there are recent developments in the digital space that are worth examining and existing challenges, such as the upcoming SWIFT up-date on the MT760, to solve.

The focus of this ICC Austria online training is to familiarize participants with the new Uniform rules on Digital Trade Transactions and other electronic payment obligations, debate in what way the e-UCP may need to change, as well as engage the audience in an exchange how to deal with the SWIFT forms in practice.
