- Client relationship managers

◆ Experts for supply chain finance

Background & Objective

From start of negotiations to acceptance & payment of goods: choosing the right Incoterm® is the basis of cost-conscious contracts, transport conditions, risk distribution & insurances

Understanding what is new with the Incoterms® 2020 is essential. However, knowledge about the changes alone will not suffice:

Corporates need to be aware of the potential opportunities, but also risks from the first start of negotiations up to the acceptance and payment of goods. They should take into consideration the choice of the appropriate Incoterm® as basis of cost-conscious contracts, payment securities, transport conditions & insurances and tax implications amongst other things. Learn to avoid misunderstandings and costly disputes arising out of sale contracts that are not adequately drafted or their content is not fully reflected in the Insurance Certificate and transport documents.

Banks bear the full credit risk if their clients face insolvency due to not carefully integrated Incoterms®, documents required, insurance & transport. In addition although banks only deal with documents and not with goods and services – they need to understand the underlying transaction to be able to assess their risk of potential losses or to eliminate the possibilities of financial crime or breach of law or violation of sanctions.

This ICC Austria conference seeks to integrate trade, tax & insurance issues with contract conditions and Incoterms® – highlight potential contractual and cost traps - and show practical solutions. We aim to combine knowledge of international experts from banks, corporates and law firms in order to avoid partial solutions, but to offer an **integrated approach** instead.
