Background & Objectives

Choosing the right combination of Incoterm® and L/C conditions is essential to obtain financial security. Isolated consideration of Incoterm® or L/C conditions may be contra-productive and a tremendous cost trap. Learn how to select and combine the contract terms and Incoterm®, L/C conditions, transport and insurance from international renowned experts.

Banks – although they only deal with documents and not with goods, services or contracts - need to understand the underlying transaction to be able to assess their risk of potential losses or to eliminate the possibilities of financial crime or breach of law or violation of sanctions.

Confidence that “the client will always get it right” should not result in blind reliance: understanding Incoterm® and contractual obligations will not only allow banks to check the delivery terms for responsibilities on carriage and insurance and the passing of risk, but will also base your communication on an equal footing, so to find the best trade finance solution for your client.

This ICC Austria training aims to combine knowledge to avoid partial solutions, but to offer an integrated approach instead.
